🖱️ May mga course na need nyo mag drag using mouse trackpad, but don't worry. Enable nyo lang yung trackpad.

May lalabas dyan na parang box, kung may gusto kayong idrag na item. Swipe lang kayo sa loob ng touchpad box, gagalaw yung arrow icon there. Itutok nyo sa item na gusto nyo idrag, tapos hold nyo atleast 2 seconds. Then drag nyo sa position na gusto nyong ilagay. Ang feature nito ay parang halintulad lang sa touchpad ng laptop devices.
